

# CALL FOR PROPOSAL

## CLIMATE RISK INFORMATION (CRI)

### Overview

**Programme**

Decision Metrics and Finance

**Date Published**

21/08/2017

**Project Type**

Early Stage Innovation

**Application Deadline**

29/09/2017

**Who should apply**

The flagship Climate Risk Information (CRI) is looking for exciting early stage innovation project proposals to complement existing project suites.

**What we are looking for**

Increasingly different parts of society are facing the need to plan and adapt to a riskier future as a result of climate change and increasing frequency of extreme weather events. While the insurance sector has been at the forefront of this area, many other stakeholders (city planners, commodity traders, infrastructure investors and engineers, and businesses) face challenges in decision-making that can be helped by greater use and access to climate risk data and models. The CRI Flagship works closely with the OASIS community to address these challenges by supporting key entities that help set standards and provide the marketplace; demonstrating the use of climate risk data and models; and supporting enabling activity such as capacity-building and financial innovation.

**Scope:** Proposals should address one of the following priorities:

- **Demonstrate the use of climate risk models and data for concrete end-user applications:** Projects should have strong involvement from investors, insurance, or non-financial end-users, and be compatible with OASIS LMF standards (not precluding compatibility with other platforms).
  - **Cities:** Scalable climate risk models and data that help cities and investors assess risk and planning decisions e.g. decision-making tools and interfaces based on evidence around the costs and benefits of adaptation.
  - **Land Use:** Using climate models and data to support insurance and long-term planning, considering both acute and chronic climate risks.
  - **Health:** Using climate risk data to enable adaptation and resilience-building action by health sector, insurance and other decision-makers.

We welcome work that targets beneficiaries in Europe, as well as more development-type proposals in emerging economies, where data availability is often a major challenge.

- **Overarching, enabling innovation:**

- **Education:** Analysis of what training is needed by data providers to build and upload usable products, training needs of non-insurance end-users to make use of climate risk data in their investment and planning decisions, novel training modules
- **Financial innovation:** Enable development or transformation of financial instruments by reducing risk uncertainty, incentivize resilience investments

A more detailed description of the CRI flagship can be found [here](#). Please engage early with the CRI Flagship Manager ([Julie.calkins@climate-kic.org](mailto:Julie.calkins@climate-kic.org)) prior to submitting proposals.

### **Project duration and funding level**

In this call, we are looking for pathfinder and partner accelerator projects. Eligibility criteria and full details can be found in the project proposal guidelines, link [here](#). Please pay attention to the changed requirements in co-funding. Please download project proposal form [here](#).

### **Timeline & process**

The call for proposals projects will follow the following approach:

1. Submission deadline: **29 September 2017**
2. External review: **10 October 2017**
3. Steering committee decision: **mid-October 2017**
4. Final project approval and start: approval **31 October 2017; start, January 2018**

For additional information please contact Julie Calkins ([Julie.calkins@climate-kic.org](mailto:Julie.calkins@climate-kic.org)). Submit completed applications via email to [applications@climate-kic.org](mailto:applications@climate-kic.org).
