

Open Innovation Pitch Event: Stavanger Smart City Hall

#SVGSmartCityHall

Nordic Edge Expo | Forum Expo | Ishockeyveien 1, Stavanger, Norway

28.09.2017

Partners: Stavanger Municipality, Innovation Norway and Climate-KIC

Together, Stavanger Municipality, Innovation Norway and Climate-KIC issued an Open Innovation Call for the coming rehabilitation of Stavanger City Hall. The aim has been to obtain innovative ideas as to how Stavanger's City Hall – a city landmark – can be turned into a living lab for smart city solutions. Now three finalists have been chosen to present their ideas on this pitch event. The event will also showcase Open Innovation as a concept and present former open innovation-contestants that turned their idea and participation into start-ups.

About Climate-KIC

Climate-KIC is the EU's largest public private partnership addressing climate change through innovation to build a zero carbon economy.

We address climate change across four priority themes: urban areas, land use, production systems, decision metrics and finance. Education is at the heart of these themes to inspire and empower the next generation of climate leaders.

We run programmes for students, start-ups and innovators across Europe via centres in major cities, convening a community of the best people and organisations.

Our approach starts with improving the way people live in cities. Our focus on industry creates the products required for a better living environment, and we look to optimise land use to produce the food people need.

Climate-KIC is supported by the European Institute of Innovation and Technology (EIT), a body of the European Union.
