GREEN HORIZONS WEBINAR SERIES

Navigating the Common Agricultural Policy

24 SEPTEMBER 2025

16:00-17:00 CEST | 15:00-16:00 BST

WE ARE STARTING SOON

Housekeeping

- This session is being recorded.
- Recording and slides will be available on our website.
- Questions are welcome, we will address as many as we can
- Please share your feedback with us at the end

AN INVITATION: The Green Horizons Farmer Network

- European network
- For: Farmers with an innovative mindset
- To: Transition to sustainable and climate-smart agricultural practices
- Benefits:
 - Discover opportunities for collaboration, funding and participation in trials or innovation networks to help build resilience against climate change
 - Access knowledge, tools and pilot results from climate-smart agriculture projects across Europe
 - Make voices and experiences heard to shape better agricultural policy.

New: Delivering environment and climate benefits: moving from conditions to incentives

1. Common **environment and climate priority areas**
2. New **farm stewardship system (protective practices + SMRs)** to uphold high environmental and animal welfare standards adapted to the national farming context
3. **Protective practices can be supported** financially
4. **Streamlined support for environmental and climate action** (integrating current eco-schemes and AECS) with further flexibility for Member States and farmers, including a new transition payment (lump-sum) of up to 200 000 EUR
5. **New co- financing approach for agri-environmental actions (>30% by MS)**, thus **expanding financial potential for** support of ecosystem services going beyond legal obligations
6. 'Green' interventions included in the **CAP “income support” to be financed from** ring-fenced Union allocations of 295.7 billion EUR
7. Overall contribution for green budget tracking – 35% overall MFF, **43% for the NRP**
